2020

For 90 years, **SAMES KREMLIN** has been bonding, protecting and beautifying products in the finishing industry, for automotive and industrial customers.

We have provided a wide range of **pumps** and **spraying solutions** dedicated to the protection of materials and applications of

Paint,
Powder,
Sealant &
Adhesives.

INTEC SAMES-KREMLIN reinforces the **SAMES KREMLIN** offer in the application of **high viscosity** products with top-level customer references. The complementarity of offers and global commercial networks makes this

acquisition a strategic step in the development plan of the two companies.

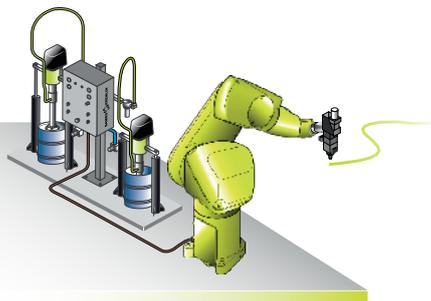

OUR VISION

Making Manufacturers more competitive

OUR MISSION

Supporting the industrial process from assembly, protection against the environment to finish, by beautifying manufactured products.

BOND

PROTECT

BEAUTIFY

Airspray

High viscosity

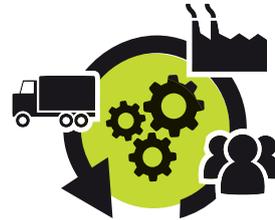

Powder

OUR STRATEGY

CUSTOMER SATISFACTION,
the mirror of our excellence, our commitment

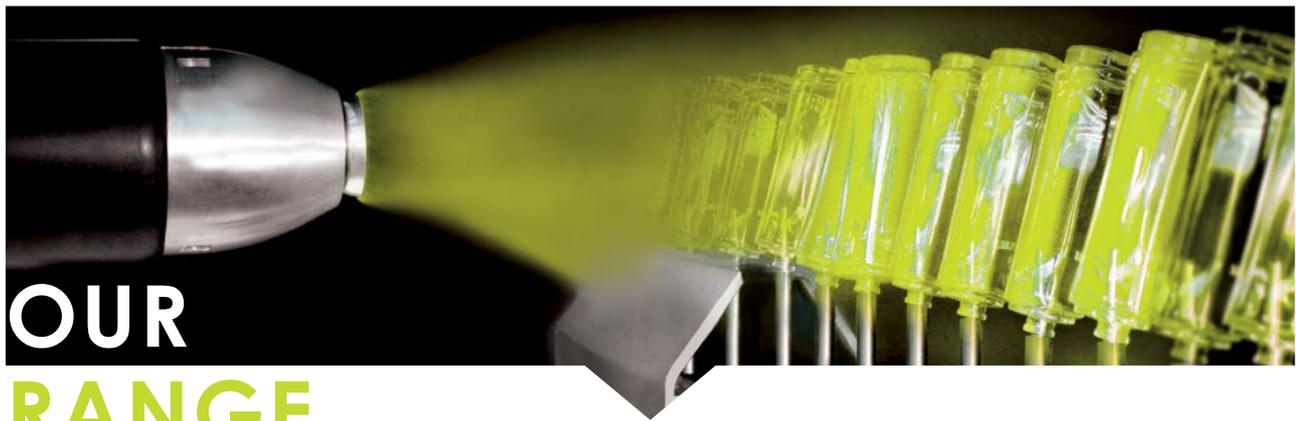

EFFICIENT SUPPLY CHAIN,
to deliver the right solution at the right place
and the right time

USEFUL INNOVATION,
because we address industrial issues with
technology and know-how

“ With a wide offer of Products,
Solutions and Services
we deliver Performances ”

OUR RANGE

SAMES KREMLIN offers customers complete solutions, from a pump to a complete application system.

We are designers and manufacturers of process equipment divided into **6 ranges**:

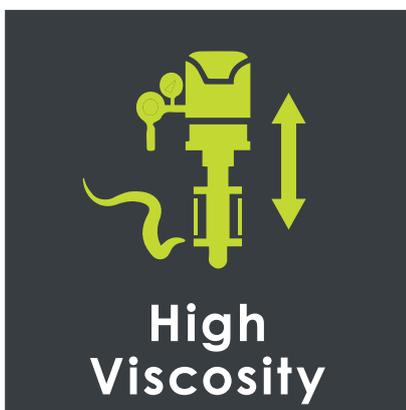

We have been an Airspray manufacturer since 1925, bringing you the very best in Finishing.

We have been the creator of Airmix® since 1975, bringing the perfect mix between quality and productivity.

We provide premium Airless products for finishers with demanding applications.

Pumping beyond possible, dispensing precisely.

Expertise for high finishing quality & efficiency.

For highest Productivity since 1960.

in 50+ different Markets and 5 Continents

With our manual spray guns, automatic and robotic applicators, our wide range of pumps & machines for fluid handling, dosing, mixing & dispensing, we allow you to **“Apply Your Skills”** for the best performance and productivity possible.

CUSTOMER BENEFITS

Our products pursue the following key objectives for our customers :

PERFORMANCE

Because finishing & dispensing are key processes in most factories, our products deliver leading performance to reach your quality requirements.

PRODUCTIVITY

Our high capability product ranges provide a real leverage on your industrial investment enabling unknown levels of production output.

SUSTAINABILITY

Robustness & reliability are standard for our products, as is providing a quick payback while saving significantly on production costs.

SAMES KREMLIN TIMELINE

90 Years of innovation

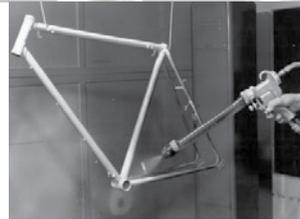

KREMLIN introduces the **first Airspray** gun in Europe to the finishing industry. The popularity of this gun spreads so quickly that all types of spray guns become known as "Kremlins".

1924

KREMLIN launches **AIRLESS** spraying in Europe.

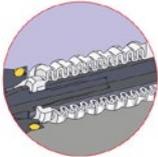

1947

SAMES introduces the **JR50**, the first industrial powder coating manual gun, to the world.

1955

SAMES disrupts the paint market with **ACCUBELL**, its best technology for water-based paint applications.

KREMLIN introduces the first packing-free pump technology, the **Flowmax®** with **SuperLife™** bellow seal.

1993

SAMES launches **INOPELL**, its innovative bell technology for powder applications.

1994

1954

Electrostatic systems are installed in many R&D facilities worldwide.

1970

1975

REXSON launches its industrial equipment range for **high viscosity** materials.

KREMLIN impacts the paint market with **Airmix®** - a unique technology combining quality finish & productivity with **high transfer efficiency** to achieve minimal overspray.

1924

SAMES, a French acronym explaining the scientific applications of the **electrostatic** mechanisms, opens in France.

REXSON introduces the **Quatro™** 4 Ball Pump range delivering high & constant flow.

The **ACCUBELL** is upgraded with the **EVO** version delivering an ultimate evolution of the iconic bell into the paint market.

SAMES launches robotics range with PPH 707 THV, the turbine **high speed SuperLife™**, to the market for electrostatic **bells**.

SAMES KREMLIN launches the **NANO GUN** electrostatic manual spray gun (Airmix® & Aispray).

SAMES develops the first powder quick color change booth, **PVV EasyColor**.

Sames & Kremlin-Rexson merged to become **SAMES KREMLIN**

Acquisition of **INTEC** to become **INTEC SAMES-KREMLIN**

1998

2000

2001

2007

2009

2011

2015

2017

2020

Integration of **robotics** on paint lines.

KREMLIN REXSON commercializes the **Xcite™ AIRMIX®** gun, distancing itself from the competition with a superb design & exclusive technology.

INOCOAT, the new electrostatic powder range. Enhanced solutions in powder coating.

KREMLIN launches **Cyclomix™**, a complete range of 2K liquid electronic proportioning systems, integrating the innovative **Injectmix™** concept.

Original Designer
& Manufacturer of

painting and
dispensing

equipment, we have been pursuing developments and innovations through our extensive integration of solutions for industrial process in various markets.

SAMES KREMLIN has integrated its own technology for decades all around the world.

Our engineering group has delivered to the market, best performances with our own equipment.

A dense and qualified network of partners in the value chain, helps us to provide the best value for cost compromise to our customers. From simple applications to the most complex engineering concepts, there is always a solution to be found at **SAMES KREMLIN** group and network.

**We Are Making
Manufacturers
More Competitive**

PROJECT SUPPORT

IN 3 KEY DRIVERS

NEW PROCESS IMPLEMENTATION

- Complete new factory/workshop from scratch (Greenfield)
- Existing factory/workshop modifications (Brownfield)

EXISTING PROCESS OPTIMIZATION

- Transfer efficiency improvement
- Cycle time reduction
- Material loss reduction

PROCESS MODIFICATION

- New material to handle
- Line Capacity increase
- New party type handling

SERVICES

SPARE PARTS

Genuine spare parts delivery with excellent supply chain and support, to maintain and extend the life of our customers production tool.

TECHNICAL SUPPORT

Our network of experts are continuously trained & qualified to deliver technical expertise on our customers production tools, while addressing any issues.

SERVICE CONTRACTS

We take the worry out of our customers industrial investment by customizing a service plan to support all their requirements.

PROCESS LAB SERVICES

We perform in-house validations & new developments of our customers processes.

CUSTOMER ASSISTANCE

A strong, reliable partnership involves supporting our customers anywhere, anytime to minimize stoppages & reduce downtime.

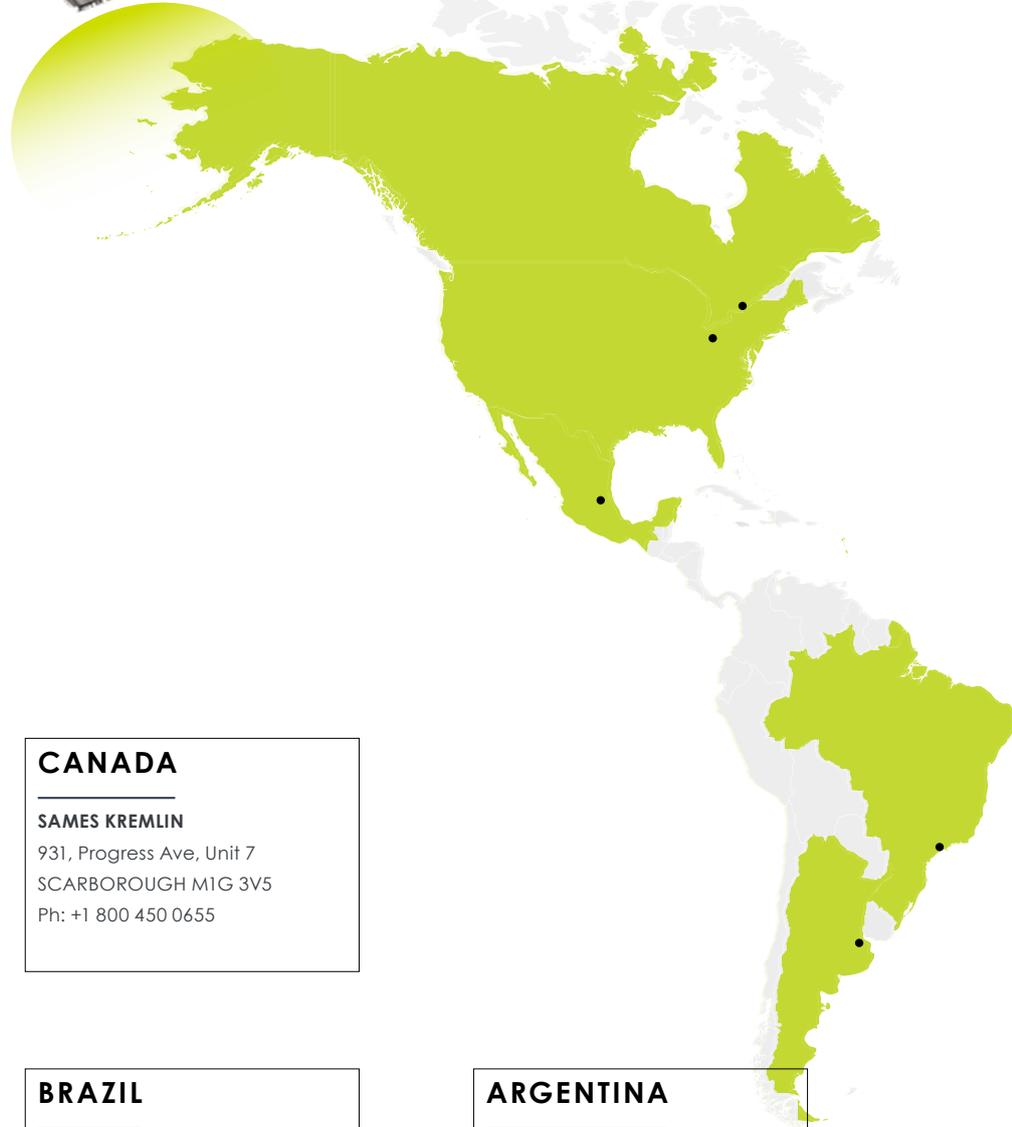

TRAINING

We train our partners to combine our products in the best way to achieve the best performances & production capacity with the highest return on investment (ROI) for our end-users. We also train our customers to process the corrective maintenance procedures to predict the failures while establishing a complete maintenance management.
