ASB

Airless Automatic Spray Gun on Base Plate

Airless / Automatic Guns

ACCURATE HIGH SPEED AIRLESS® APPLICATIONS

- Premium Airless application
- The lightest automatic Airless gun of the market
- Low maintenance cost of ownership

Markets

ASB

Airless Automatic Spray Gun on Base Plate

The ASB automatic spray gun offers superior atomization whatever the line speed thanks to perfect balance between high pressure and high flow rate. It offers precise application - coating applied directly on the target - due to fast response time.

Developed for high production rates, ASB guns provide superior atomization at medium to high flow rate and low overspray for minimal paint wastage.

The ASB guns are the lightest automatic Airless guns on base plate, decreasing bearing wear of painting machines due to lightweight gun. Their compact design allows easy access to recessed part areas. They can be fitted with a choice of 184 tips: Skill® super fine finishing Airless tips, Flat for fine finishing, and reversible Tip Top for protective coatings. The simplicity and the quality of the material used guarantees low maintenance costs. They are well suited for applying harsh coatings (acid catalyst, UV coating), water-based, high viscosity and abrasive materials.

Benefits per technologies	Transfer efficiency	Atomization quality	Flow rate
Airspray spraying	☆☆☆	☆☆☆☆	☆
Airmix® spraying	☆☆☆☆	☆☆☆	☆☆☆
Airless® spraying	☆☆☆	☆☆ (with Skill™ tips)	☆☆☆☆

Technical data table

Designation	Value	Unit: metric (US)
Maximum Fluid Pressure	240 (3480)	bar (psi)
Recommended Fluid Pressure	240	bar (psi)
Maximum Air Pressure	6 (87)	bar (psi)
Transfer Efficiency	81	%
Trigger Air Pressure	3 (43)	bar (psi)
Sound Level	78.4	dBA

Airless spray technology

Skill Tip

Performance

- 1 Easy offer, the same gun works in Ω or T version by adding one plug
- 2 Fast response time and High Speed cycling capability
- ♦ The ASB gun is the lightest gun on the market decreasing paint machine wear
- ♦ Compact design for easy integration

Productivity

- 3 Full versatility with other Sames spray guns, only 4 screws to remove
- 4 Smart operation: trigger indicator located on back of gun
- 5 Wide range of tips available (Flat, reversible Tip Top and fine finishing Skill™)
- ♦ Easy maintenance with simple construction (only 14 parts) for an overall low maintenance costs

Sustainability

- 6 Two choices of cartridges, PTFE or V-seal energized (also called GT), prevents leakage
- 7 Optional cartridge lubrication for long term usage
- 8 Compatibility with full range of bases
- ♦ Anodized body for excellent wear resistance
- ♦ Stainless steel fluid passages for full compatibility with most coatings
