## RFV 2000

Powder guns reciprocator

The RFV 2000 reciprocator is intended to equip automatic installations for powder coating. It features a vertical and horizontal Movement System

The RFV 2000 reciprocator is intended to equip automatic installations for powder coating. It can lead to a combination of powder projectors such as:

- 4, 6, 8 or 10 Auto Mach-Jet powder applicators
- 2 or 4 inoBell powder turbines

The RFV 2000 reciprocator is controlled by a REV 800, MCR control module, or PLC control module R for more complex automatic facilities.

The gauge axis, hand operated or powered, is available as an option.

*In the product reference number below, the xxx stands for the stroke of the RFV 2000, from 80 to 340 cm. Default stroke is 200 cm.*

sames **inocoat**

### Performance

- ◆ Stroke and speed adjustable remotely over a very wide range.
- ◆ No special prepared area required (the robot can be positioned or moved manually without effort).

### Productivity

- 1 Extremely simple construction and operation (very long service life).

### Sustainability

- ◆ Optimum safety - CE approved.
- ◆ Reduced maintenance - limited to cleaning the chains and transmission devices.

### Description
